

Janusz Rębielak
CURRICULUM VITAE
(updated on October 02nd, 2020)

Basic data:

- I was born on 10th October 1955 in Bierutów near Wrocław in Poland,
- I completed the High School of Juliusz Słowacki in Oleśnica,
- I graduated from the Department of Architecture at the Wrocław University of Technology in 1979, in Poland,
- I got the Ph.D. degree in 1982 in the Institute of Architecture and Town Planning at the Wrocław University of Technology,
- I got the D.Sc. degree in 1993 at the Department of Architecture at the Wrocław University of Technology,
- the title of professor has been conferred on me by the decree of the President of the Republic of Poland issued in June 2006,
- I am married since 1980, I have three children.

Range of scientific activity:

- the main domain of my research interests are numerical methods of shaping and design of the space structures and their applications as the lightweight structural systems of the large span roofs; among them are methods of calculations of statically indeterminate structures; moreover systems of tall buildings and foundation structures; the innovative combined foundation system, which makes possible the safe foundation of the heavily loaded building on subsoil of small load carrying ability located particularly in earthquake areas or in the mining damage sectors, the buildings designed by means of the application of these structural systems may obtain interesting and individual architectonic views; I am also involved in working out innovative concepts of technical solutions for retractable and foldable roof structures, which can make possible to close and then to open fast and smoothly the covered area,
- to the most important my achievements I count the followings: the innovative system of combined foundation considered as the ground-breaking technical invention in the safe foundation of buildings; the two-stage method of calculation of statically indeterminate trusses, which among others makes possible easier the initial process of their structural design; several types of structural systems of the lightweight roof covers like the crystal tension-strut structure or a group of the type of VA(TH) structures; the method of secondary grid deformation, which enables to design the most regular triangular grids for geodesic domes,
- so far I have published 226 scientific papers, including 3 monographs and 4 patents,
- since 1st October 2006 I am chairman of the Committee for Architecture and Town Planning of Wrocław Branch of the Polish Academy of Sciences (PAN); term 2006-2010, term 2011-2014, 2015-2018 and term 2019-2022,

- I am member of the Committee for Architecture and Town Planning of the Polish Academy of Science (PAN), term 2020-2023; I was also member of this Committee in terms 2016-2019 and 2003-2006,
- at present I am member or in the past I was member of some national and international scientific societies as well as a member of scientific boards or editorial committees of national and international scientific journals,

- I was an organizer of some international scientific symposiums, conferences and workshops, among them were as follows:
 - Mini-Symposium (MS-030) entitled "New methods of approximate static calculations" for 11th International Conference on Computational Methods (ICCM2020), Ho Chi Minh City, Vietnam, August 9th – 12th, 2020; because of the pandemic of coronavirus the conference was held at the Cloud, I have given the Semi Plenary Lecture entitled "Symmetry and superposition rules proposed to apply in engineering design",
 - Special Session (SS13) pt. „Architectural and Structural Methods of Design and Calculation" carried out during proceedings of The Seventh International Conference on Structural Engineering, Mechanics and Computation (SEMC2019), September 2-4, 2019, in Cape Town, in South Africa,
 - Mini-Symposium (MS-033) entitled „Methods of approximate calculations in static analyses" carried out during proceedings of The 10th International Conference on Computational Methods (ICCM2019), July 09-13, 2019, in Singapore,
 - Mini-Symposium (MS-022) entitled „Methods of approximate calculations of statically indeterminate systems" carried out during proceedings of The 9th International Conference on Computational Methods (ICCM2018), August 06-10, 2018, in Rome, in Italy,
 - Mini-Symposium (MS-057) „Analysis and Design Methods of Building Structures Located in Earthquake Areas" organized during proceedings of The 8th International Conference on Computational Methods (ICCM2017), July, 25-29, 2017, in Guilin, in China,
 - Mini-Symposium (MS965) „Principle of superposition in structural analysis and design", which was held during 12th World Congress on Computational Mechanics (WCCM XII) and 6th Asia-Pacific Congress on Computational Mechanics (ECCM VI), July 24-29, 2016, in Seoul, in Korea,
 - Mini-Symposium (MS252) „Methods of approximate static analyses of complex structural systems", held during 11th World Congress on Computational Mechanics (WCCM2014), 5th European Conference on Computational Mechanics (ECCM V) and 6th European Conference on Computational Fluid Dynamics (ECFD VI), in July 20 - 25, 2014, in Barcelona, in Spain,
- I organized the invited scientific session "Design Methods of Spatial Structures in Architecture and Civil Engineering" during The 10th World Multi-Conference on Systemics, Cybernetics and Informatics in July 2006, in Orlando, Florida, USA,
- I was a chairman of Organizing Committee of the International Conference "Symmetry of Forms and Structures", proceedings of which were held in September 14-19, 2009 in Wrocław and Kraków, in Poland,
- I was an organizer of the international scientific workshops "Innovative Structural Systems in Architecture", first edition of which was held in 6-8 November 2014, the second edition was held in 3-5 November 2016, while the third edition - connected with celebration of Poland's 100th anniversary of independence - was held in 9-10 November 2018; these

workshops were items of the activity schedule of the Committee for Architecture and Town Planning of the Polish Academy of Sciences (PAN), Wrocław Branch, which I lead,

- I led six completed grants awarded by former KBN (State Committee for Research of the Republic of Poland) and currently awarded by the Ministry of Science and Higher Education in Warsaw and also by the National Centre of Science in Cracow.

Academic affiliations:

- since 1st March 2008 until 30th September 2020 I have been employed as the professor at The Tadeusz Kosciuszko Cracow University of Technology, at the Faculty of Architecture, in the Institute of Engineering Design (A-4), initially in Division of Construction Engineering (A-42), since 1st October 2020 – retirement,

- since 1st September 2017 until 30th September 2020 I was a head of Chair of Structures and Construction Engineering (A-42),

- in the period 1st February 2016 - 31st August 2017 I was a head of Laboratory of Building Structures (A-44),

- since November 2015 until October 2019 I was head of Postgraduate Study “Building Information Modeling – digital technologies in architecture and construction”,

- since 1982 until 2001 I was employed in the Division of Building Structures at the Department of Architecture of the Wrocław University of Technology,

- since the 1st January 1993 I was the acting manager of the Division and since the day of the 1st August 1994 until 31st January 2001 I was a head of the Division of Building Structures at the Department of Architecture of the Wrocław University of Technology,

- since the 1st February 2001 till 30th June 2007 I was a head of the Division of Structures and Building Engineering at the Department of Architecture of the Wrocław University of Technology; after the cancellation of the Division of Building Engineering its staff was incorporated into the staff of the Division of Building Structures, which took the new name,

- since 1981 until 1997 I gave lectures on *Engineering design* at the Department of the Interior Architecture and Industrial Design of the present Academy of Fine Arts in Wrocław,

- in academic year 1984/85 I worked as a research fellow at the Department of Architecture of Delft University of Technology, the Netherlands,

- between 1st April 2001 and 1st February 2002 I was a visiting research fellow in Kawaguchi Lab (Shell and Spatial Structures Laboratory) in the Institute of Industrial Science at the University of Tokyo, in Japan due to the fellowship awarded by the JSPS (Japan Society for the Promotion of Science),

- since 1st September 2004 until 31st January 2007 I was also employed as a professor in The University of Economy in Bydgoszcz, where I was a head of the Laboratory of Building Structures and Advanced Technology,

- I am supervisor of 8 completed doctor's theses and supervisor of 69 graduate and undergraduate diplomas.

Professional activities:

- I have the qualifications for the architectural design without any limits (in Poland),
- in the terms between 1998-2002 and 2005-2013 I managed my own design studio for preparing projects of various types of architectural objects and also prepared technical documentations for various types of architectonic objects and making projects for architectonic competitions, three of them were awarded.

Other interest:

history, aviation, music, fine arts.

Main Honours and Awards:

I obtained the awards of the Rector of the Wroclaw University of Technology (1982, 2004), awards of the Dean of Department of Architecture of the Wroclaw University of Technology (1990, 1993, 1998, 2000, 2004), the Golden Mark of Distinction of the Wroclaw University of Technology (1996), The Silver Order of Merit (1998), The Golden Order of Merit (2004) and The Knight's Cross of the Order of Polonia Restituta (2014).

Correspondence address: e-mail: j.rebielak@wp.pl

LIST OF PUBLICATIONS

(updated on October 02nd, 2020)

1. Rębielak Janusz: *Zastosowania modeli numerycznych definiowanych w języku programowania Formian (Applications of numerical models defined in the programming language Formian – in Polish)*, Komputerowe Wspomaganie Projektowania, Wytwarzania i Eksploatacji, ed. Radosław Trębiński, ISBN 978-83-7938-303-0, Wojskowa Akademia Techniczna, Warszawa 2020, pp. 229-236.
2. Rębielak Janusz: *Symmetry and superposition rules proposed to apply in engineering design*, 11th International Conference on Computational Methods (ICCM2020) organized by Ho Chi Minh City University of Technology, Vietnam, August 9th – 12th, 2020, Virtual Conference at the Cloud, <https://www.sci-en-tech.com/ICCM/index.php/ICCM2020/ICCM2020/paper/view/4523>
3. Rębielak Janusz: *Two-stage method applied for approximate calculations of selected types of statically indeterminate trusses*, International Journal of Computational Methods, 06 February 2020, DOI: 10.1142/S0219876220410042.
4. Rębielak Janusz: *Rules of Symmetry And Principle of Superposition in Design Processes of Architectonic Structures*, Symmetry: Art and Science, 2019, Special Issue for the 11th Congress and Exhibition, Kanazawa, Japan, November 25-30, 2019, Nos 1-4, pp. 234-237.

5. Rębielak Janusz: *Analysis of the Results Obtained from the Application of the Two-Stage Method with Calculations of Some Statically Indeterminate Trusses*, Journal of Civil Engineering and Architecture, Vol. 13, No 10, Serial number 143, October 2019, pp. 599-607.
6. Rębielak Janusz: *Architectonic forms and engineering systems designed by application of method of superposition*, Advances in Engineering Materials, Structures and Systems: Innovations, Mechanics and Applications, Full papers, ed. A. Zingoni, Taylor & Francis Group, ISBN 978-1-138-38696-9, London, 2019, pp. 2322-2327.
7. Rębielak Janusz: *Architectonic forms and engineering systems designed by application of method of superposition*, Advances in Engineering Materials, Structures and Systems: Innovations, Mechanics and Applications, ed. A. Zingoni, Taylor & Francis Group, London, 2019, pp. 853-854.
8. Rębielak Janusz: *Approximate calculation of certain type of statically indeterminate truss*, Proceedings of the 10th International Conference on Computational Methods, 9th-13th July 2019, Singapore, ScienTech Publisher, LLC, USA, (ISSN 2374-3948, online).
9. Rębielak Janusz: *Przykłady zastosowania zasady superpozycji w analizie statycznej i w projektowaniu budowlanym (Examples of application of principle of superposition in statical analysis and in engineering design)*, Technologie Budowlane. Konstrukcje i Materiały, Wydawnictwo Politechniki Krakowskiej, ISBN 978-83-65991-18-8, Kraków, 2018, pp. 93-108.
10. Rębielak Janusz: *Foundation structure proposed for earthquake areas*, Proceedings of the 7th International Conference on Protection of Structures against Hazards, 29-31 October 2018, Hanoi, Vietnam, ISBN: 978-981-11-7777-4, pp. 179-184.
11. Rębielak Janusz: *O kształtowaniu konstrukcyjnym lekkich przekryć prętowo-ciężnowych*, Inżynieria i Budownictwo, nr 9, 2018, pp. 473-476.
12. Rębielak Janusz: *Analysis of the results obtained from the application of the two-stage method with calculations of some statically indeterminate trusses*, Proceedings of The 9th International Conference on Computational Methods (ICCM2018), 06-10 August 2018, Rome, Italy, Published by Scienteched Publisher LLC, USA, ISSN 2374-3948 (online), pp. 347-355.
13. Rębielak Janusz: *Two-stage method applied in calculations for statically indeterminate truss of larger span*, Proceedings of The 9th International Conference on Computational Methods (ICCM2018), 06-10 August 2018, Rome, Italy, Published by Scienteched Publisher LLC, USA, ISSN 2374-3948 (online), pp. 356-363.
14. Rębielak Janusz: *Examples of applications of two-stage method in calculations of statically indeterminate trusses*, International Journal of Computational Methods Vol. 15, No. 5, 2018, DOI: 10.1142/S0219876218440097.
15. Rębielak Janusz: *Simple method of approximate calculation of statically indeterminate trusses*, International Journal of Computational Methods, Vol. 15, Issue 1, 2018, DOI: 10.1142/S0219876218400261.
